

Cyber criminals are smart. Our Cyber Cover is smarter

At BGi.uk we understand that the risk of cyber threats is greater than ever before. Could your business survive without access to your systems and data? Personal data has real value to criminals; losing it could be seriously damaging.

The Aviva difference

BGi.uk and Aviva work together, combining our personal expertise with one of the most extensive single packages of cover out there. Aviva's Cyber insurance offers three distinct benefits: a free cyber health check* which helps you spot weaknesses in your business IT security before a hacker does; insurance cover designed specifically for SMEs that can also be added to your existing business insurance policy; and a 24/7 incident helpline to experts who will co-ordinate the end-to-end response to get your business back on track.

Data breaches impact business owners significantly in terms of time, money and stakeholder trust. 46% of SMEs have been affected by a cyber-security breach in the last year alone.¹ What's more, data breaches aren't always caused by hackers. Simple mistakes, such as leaving a laptop on a train, can be just as damaging.
